Re: Letter of Reference – B-21: Washrack and Maintenance Hangar

To Whom It May Concern:

Federal Contracting, Inc. doing business as Bryan Construction, Inc., contracted Saskarc to detail, fabricate, paint, ship and erect Structural Steel, Joists and Decks and Miscellaneous Steel for B-21: Washrack and Maintenance Hangar located at Ellsworth Air Force Base in Box Elder, South Dakota.

Saskarc has completed the following scopes:

- Creation of shop drawings for all steel including a model, and erection drawings
- Fabricate, paint, deliver and erect Structural Steel for B-21: Washrack and Maintenance Hangar with a total weight of 2,641,000 lbs.

Some highlights/challenges of this project include:

- Adapting to revised customer specifications and design drawings after the project started to maintain the highest level of quality.
- Delivering all steel to site on time to meet the installation schedule.
- Collaboration with the site team to ensure Erection Sequences are in line with the overall project schedule.

Through the entire project, we enjoyed working with a very professional and dedicated Saskarc Project Team, who maintained the highest level of quality and safety to meet the construction schedule. Saskarc was dedicated to working as a team with Bryan Construction, Inc., to ensure the successful completion of this project scope.

We believe they will achieve every success in any opportunity given to them in the future and highly recommend Saskarc for any large scale and/or complex steel fabrication projects.
